# EZYPole's Innovative Design

Ezypole's innovative range of lowerable poles has revolutionised the pole industry by reducing installation and on-going maintenance costs. We are now one of the leading pole suppliers to the private and public sectors around the world.

Our range of lowerable poles eliminate the use of any elevating working platforms and heavy lifting equipment such as cranes, which in turn eliminates O.H&S issues. Other benefits include easily accessing equipment at ground level in a matter of minutes through controlled lowering, this is done via a attachable manual winch system or simply walking the pole up or down with one or two men.

Whether you need to change a light fitting, clean a solar panel, upgrade radio transmitting equipment or just simply adjust a camera lens, the advantages of a lowerable pole will save you time and money in the long run.

## APPLICATIONS

- ♦ Exterior Lighting
- ♦ Solar Lighting
- ♦ CCTV Security
- ♦ Time Lapse Cameras
- ♦ Weather & Monitoring Equipment
- ♦ Transmission & Radio Antennas
- ♦ Advertising & Signage
- ♦ Temporary Installations

## KEY BENEFITS

Save Installation  
Time

Installation at  
ground level

Reduced  
Installation &  
Maintenance  
Costs

OH&S  
Compliant

1 Person  
Installation

# EZYWinch Heavy Duty

---

The pole is lowered and raised with the aid of a 'demountable' manual winch frame that attaches to the lower section of the pole. The pole effortlessly and safely lowers to the ground and then can be easily 'winched' back up to its standing position.

## APPLICATIONS

CCTV

Solar

Lighting

Transmission

Instruments

Pole Lowering Progression

Personnel Required  
for Installation

Installation Time

30-60  
minutes

## KEY BENEFITS

- ♦ Suitable for all industrial and public access areas.
- ♦ Tilting of pole can usually be carried out by a single operator.
- ♦ Demountable winch assembly allows for a safe installation whilst also reducing costs on multiple installations.
- ♦ Constructed in high tensile steel and hot dip galvanised after fabrication for durability.
- ♦ Secure lockable access panel requires unique tool to access internal locking mechanisms.
- ♦ Internal locking and preventative fail mechanism for additional security.

# EZYTilt Medium Duty

---

With its unique hinged base plate, the Medium Duty Pole winch pole allows the user a risk free method of lowering and raising the pole by attaching the winch frame to the base plate and the clipping a shackle to the winch attachment point of the pole.

## APPLICATIONS

CCTV

Solar

Lighting

Transmission

Instruments

Pole Lowering Progression

## KEY BENEFITS

- ♦ Suitable for all industrial and public access areas.
- ♦ Tilting of pole can usually be carried out by a single operator.
- ♦ Stable structure for all types of lighting, CCTV, Monitoring and solar applications.
- ♦ Demountable winch assembly allows for a safe installation whilst also reducing costs on multiple installations.
- ♦ Constructed in high tensile steel and hot dip galvanised after fabrication for durability.

Personnel Required  
for Installation

Installation Time

30-60  
minutes

# EZYLift Light Duty

---

EZYLift is a lowerable pole that provides fast and safe installation for light duty applications. The pole utilises a cleverly designed lowerable base plate design with a removable hinge pin, it is easily raised by walking it up to a vertical position then fixing the 2 plates together with unique security bolts.

## APPLICATIONS

Solar

Lighting

Transmission

Pole Lowering Progression

## KEY BENEFITS

- ♦ Suitable for all industrial and public access areas.
- ♦ Tilting of pole can usually be carried out by a single operator.
- ♦ Stable structure for light duty applications such as CCTV camera and LED light fittings.
- ♦ Hinged base plate design does not require any other equipment to assist lowering or raising the pole.
- ♦ Constructed in high tensile steel and hot dip galvanised after fabrication for durability.
- ♦ Optional Secure base cover prevents any unauthorised lowering of the pole.

Personnel Required  
for Installation

Installation Time

15-30  
minutes

# EZYFoot Footings System

EZY-footing provides a quick and environmentally friendly solution to support the entire EZYpole range of products. Typical concrete footing systems need a few days curing time before the poles can be installed, while EZY-footing allows full installation in under 60 minutes.

## APPLICATIONS

CCTV

Solar

Lighting

Transmission

Instruments

Pole Lowering Progression

## KEY BENEFITS

- ♦ Can handle bending moment loads of up to 700Kg's and
- ♦ load capacities that exceed 8.5 tonne.
- ♦ No concrete
- ♦ Reduce labour cost.
- ♦ No excavation or spoils.
- ♦ No engineering inspections required.
- ♦ Suitable in all wind categories and soil types.
- ♦ Great for hard to access, sloping or remote sites.

Personnel Required  
for Installation

Installation Time

30-60  
minutes
